Transitioning away from LIBOR presents a huge challenge for financial markets. By clearing CurveGlobal One and Three Month SONIA Futures, we help ensure a smooth and orderly transition of your sterling portfolios.

LCH Spider, our automated portfolio margining tool, is now available for cross-product margining of all CurveGlobal contracts — including SONIA Futures — against OTC swaps. This provides additional opportunities for capital efficiencies by reducing collateral requirements for SONIA Futures against offsetting OTC positions.

CLEARING INNOVATION

We have now expanded our SONIA Futures offering with the launch of clearing for CurveGlobal One Month SONIA Future. This new monthly contract has been designed to complement the existing CurveGlobal Three Month SONIA Future.

Our clearing offering for the existing Three Month contract has also been enhanced, with the addition of four new serial months to join the quarterly cycle.

So take advantage of the opportunity to clear your entire rates futures portfolio through LCH — maximising your initial margin savings and maintaining your competitive edge. As well as these efficiencies, you’ll gain access to unparalleled rates liquidity and the most extensive service offering of any CCP — from OIS, FRAs, IRS and inflation to futures.

KEY BENEFITS

01. Enable smooth transition to SONIA
02. Hedge positions more easily
03. Avoid legging risk by using the CurveGlobal Inter Commodity Spread (ICS)
04. Consolidate listed rates initial margin — and make savings with PAIRS margin methodology
05. Increase capital efficiencies for SONIA contracts through LCH Spider

HOW DOES IT WORK?

The CurveGlobal One Month and Three Month SONIA Futures are based on the overnight reference rate for sterling, as calculated and published by the Bank of England.
