Late netting fees⁵:

For commodity option and future contracts, LCH SA applies an additional fee per contract which should have been netted in D day (such late netting fees are applied when the number of netted/offset contracts between D at 10:30 am CET and D+1 at 10:30 am CET is superior to the sum of buy and sell contracts posted in D) on the basis of the following grid, depending on the number of days remaining before the contract expiry (X):

- At any time of the contract life until X-16 days (options and futures):
 - ✓ € 1 per contract from 50 to 500 no netted contracts
 - ✓ € 2 per contract from 501 to 1,000 no netted contracts
 - ✓ € 6 per contract over 1,001 no netted contracts
- Close to expiry of the future contract (from X-15 days), futures only: € 50 per contract.

For the specific case of positions on future contract resulting from the exercises and assignments on the associated options at maturity date (Y), the Clearing Members can offset the resulted future positions until Y+2 day at 10:30 am CET. These positions on future contract are created by the clearing system during the end of day batch process in Y day. After this deadline in Y+2 day at 10:30 am CET, the late netting fees will be charged by LCH SA to the Clearing Members in accordance with the fees grid.

Penalties for storage certificates not processed via the “required system” – Milling Wheat and Corn contracts only:

The storage certificates must be processed via the “required system” as defined in a [notice](#). For each selling open position per order giver not covered by a digital storage certificate recorded in the “required system”, LCH SA will charge the clearing member with a penalty of € 20 per contract with a minimum of € 1,000.
