

OPERATIONS

8 September 2015

**Go live date for AtomX Lot 1 and additional intraday series cycles
Launch in production from Monday 26 October 2015**

Dear Clearing Members,

LCH.Clearnet SA is pleased to announce the launch of AtomX Lot 1 and additional intraday series cycles in production from Monday 26 October 2015. The AtomX Lot 1 covers the creation of the Flex contracts with an expiry day on the third Friday of the month. The derivatives instruments using the Flex contracts facility can be customized by choosing the option types, the settlement styles and the strike prices.

Previous communications are available here: <http://www.lchclearnet.com/news-events/members-updates/general-information>. The presentation, updated specifications and associated samples of files are available in the LCH.Clearnet secured area (https://secure-area.lchclearnet.com/secure_area/Default.asp).

The tests platform remains available for Clearing Members who want to test new functionalities.

The launch (date and content) is subject to relevant internal and regulatory reviews.

The Operations Department remains at your disposal for any information or assistance.

Best regards.
